

Mind the drone

User Manual

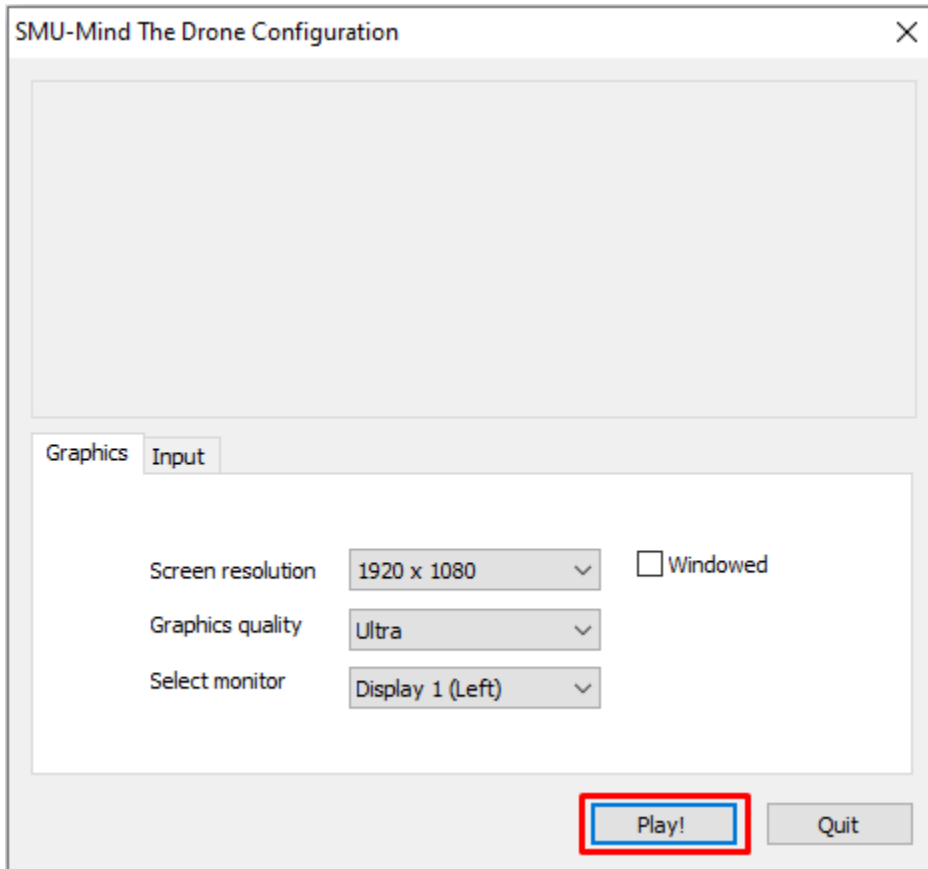

WINDOWS OS:

Link - <https://smu.sg/mindthedrone>

1. Download the application using link shared by instructors / professors
2. Unzip the files at your desired location
3. Start the application - "MindTheDrone.exe"

4. In the prompt that shows up, you can change resolution and texture quality of the application, if not desired, please press "Play"

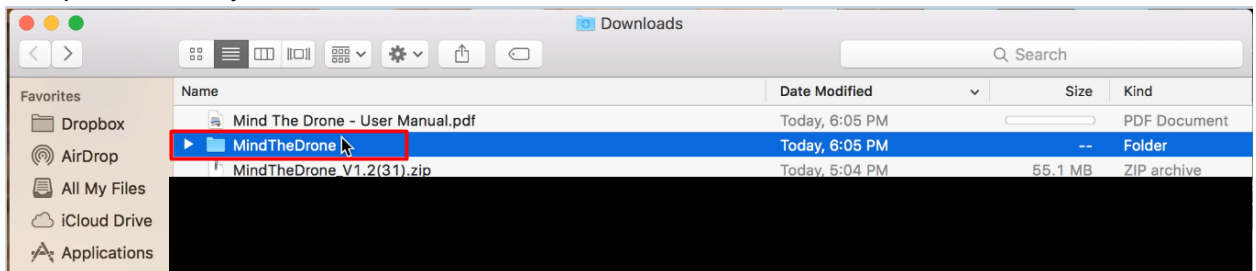

5. The application will start.

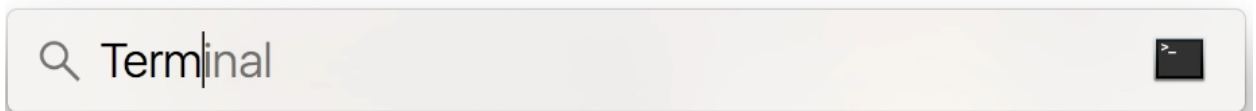

MAC OS :

Link - <https://smu.sg/mindthedrone>

1. Download the application using link shared by instructors / professors
2. Unzip the files at your desired location

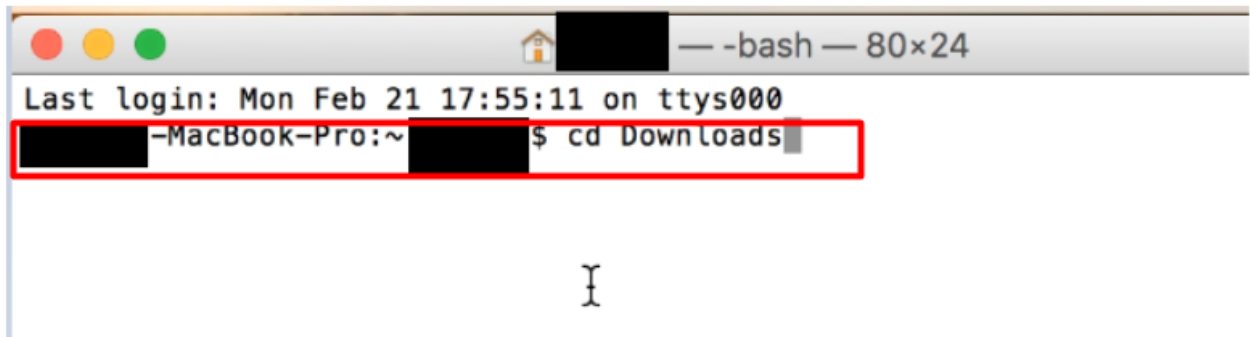

3. Open Spotlight search (shortcut- cmd+"SPACE") and type terminal. Press ENTER.

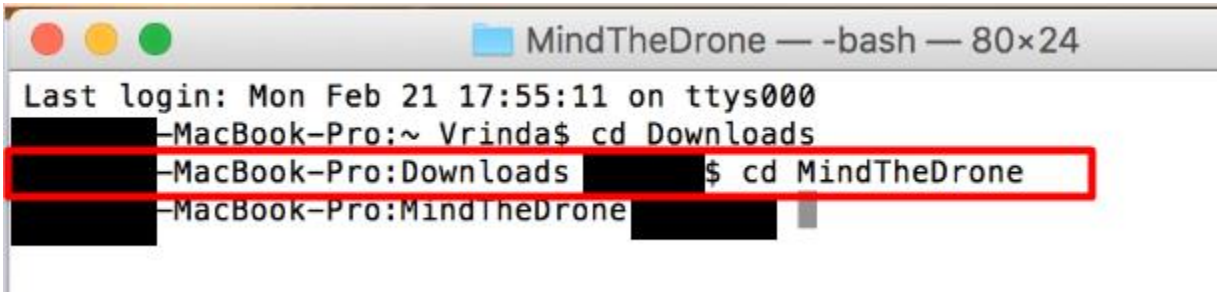

4. Navigate to the directory where the application has been unzipped using “cd” command and execute the following command: `chmod a+x MindTheDrone.app/Contents/MacOS/*`
5. For example , if the unzipped file is in “Downloads/MindTheDrone” , follow these steps in terminal

Command 1 - `cd Downloads`
- PRESS ENTER

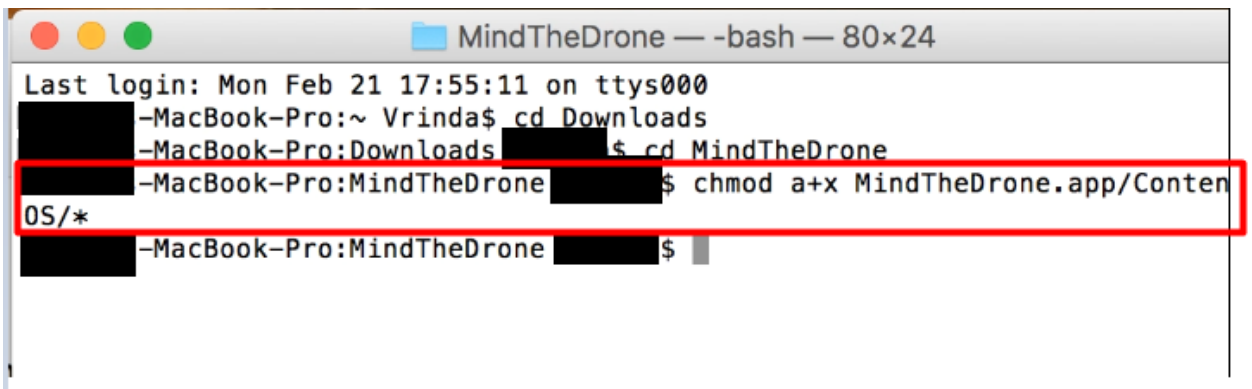

A terminal window titled "-bash — 80x24" showing the command `cd Downloads` being entered. The prompt is `~`. The window title is partially obscured by a black box.

Command 2 - `cd MindTheDrone`
- PRESS ENTER

A terminal window titled "MindTheDrone — -bash — 80x24" showing the command `cd MindTheDrone` being entered. The prompt is `Downloads`. The window title is partially obscured by a black box.

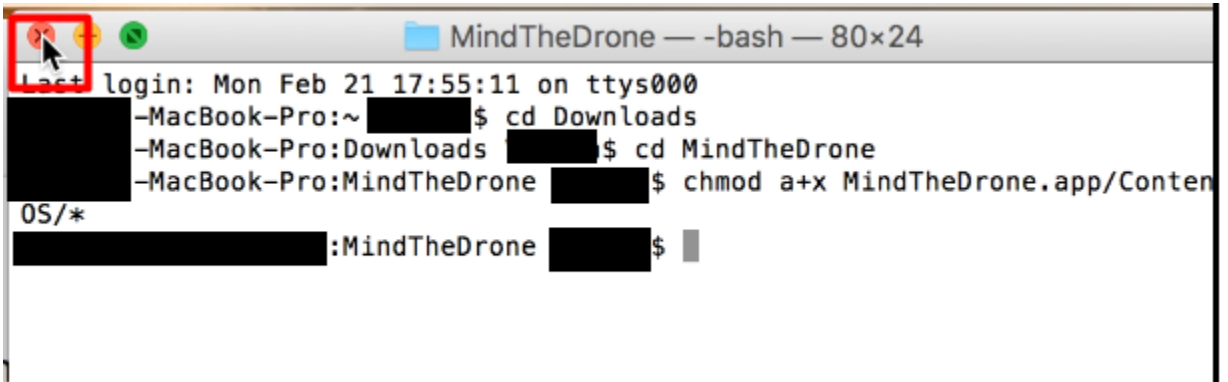

Command 3 - `chmod a+x MindTheDrone.app/Contents/MacOS/*`
- PRESS ENTER

A terminal window titled "MindTheDrone — -bash — 80x24" showing the command `chmod a+x MindTheDrone.app/Contents/MacOS/*` being entered. The prompt is `MindTheDrone`. The window title is partially obscured by a black box.

If no error shows, it means all the commands have worked

6. Close the terminal

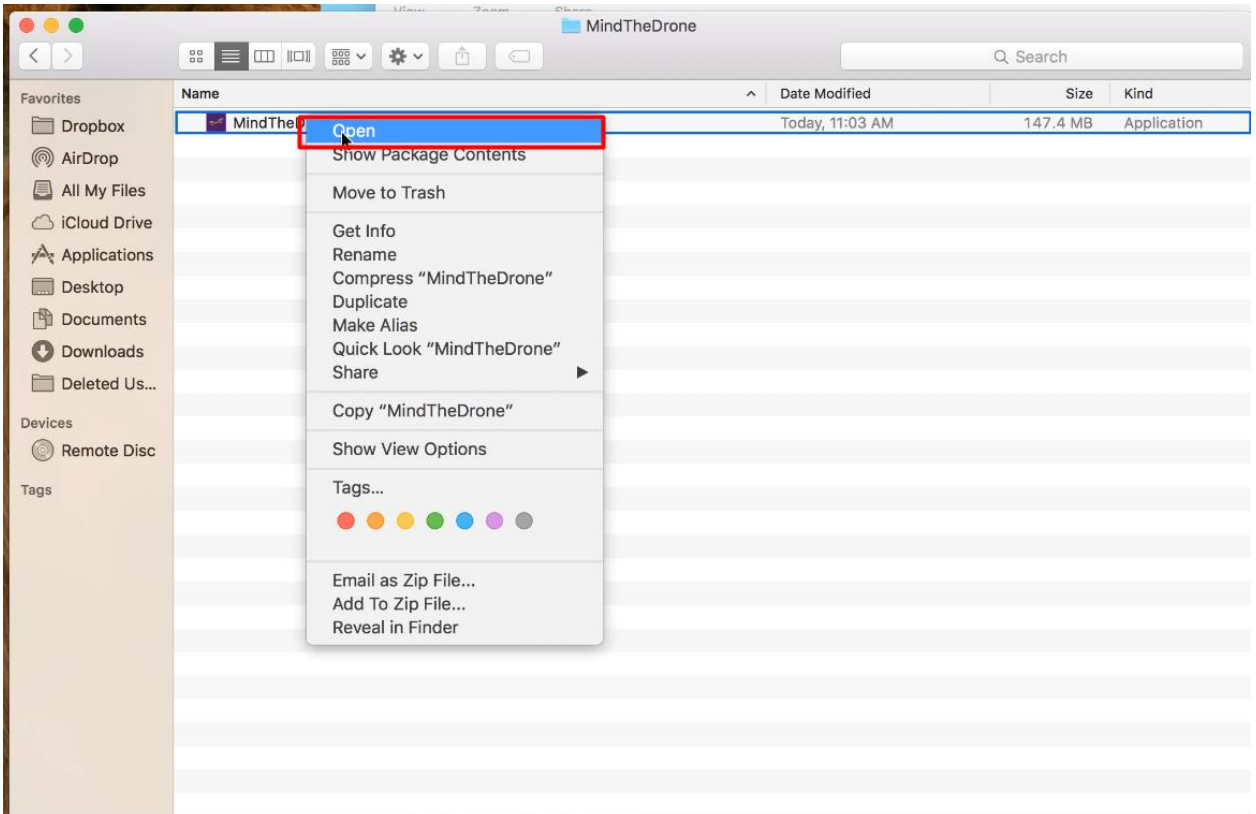

A terminal window titled "MindTheDrone — -bash — 80x24". The window shows the following text:

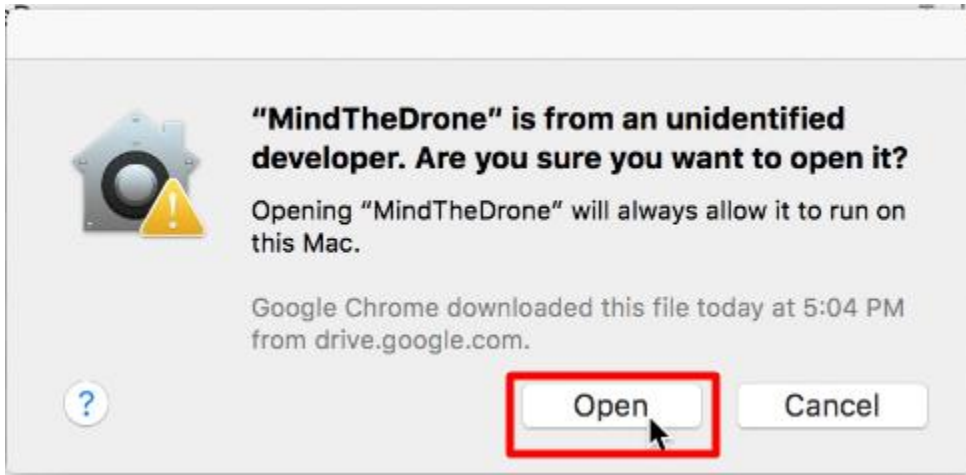

```
Last login: Mon Feb 21 17:55:11 on ttys000
-MacBook-Pro:~ ██████████ $ cd Downloads
-MacBook-Pro:Downloads ██████████ $ cd MindTheDrone
-MacBook-Pro:~:MindTheDrone ██████████ $ chmod a+x MindTheDrone.app/Content
OS/*
-MacBook-Pro:~:MindTheDrone ██████████ $ █
```

The window's title bar includes standard macOS window controls (red, yellow, green buttons) and a red box highlights the red button.

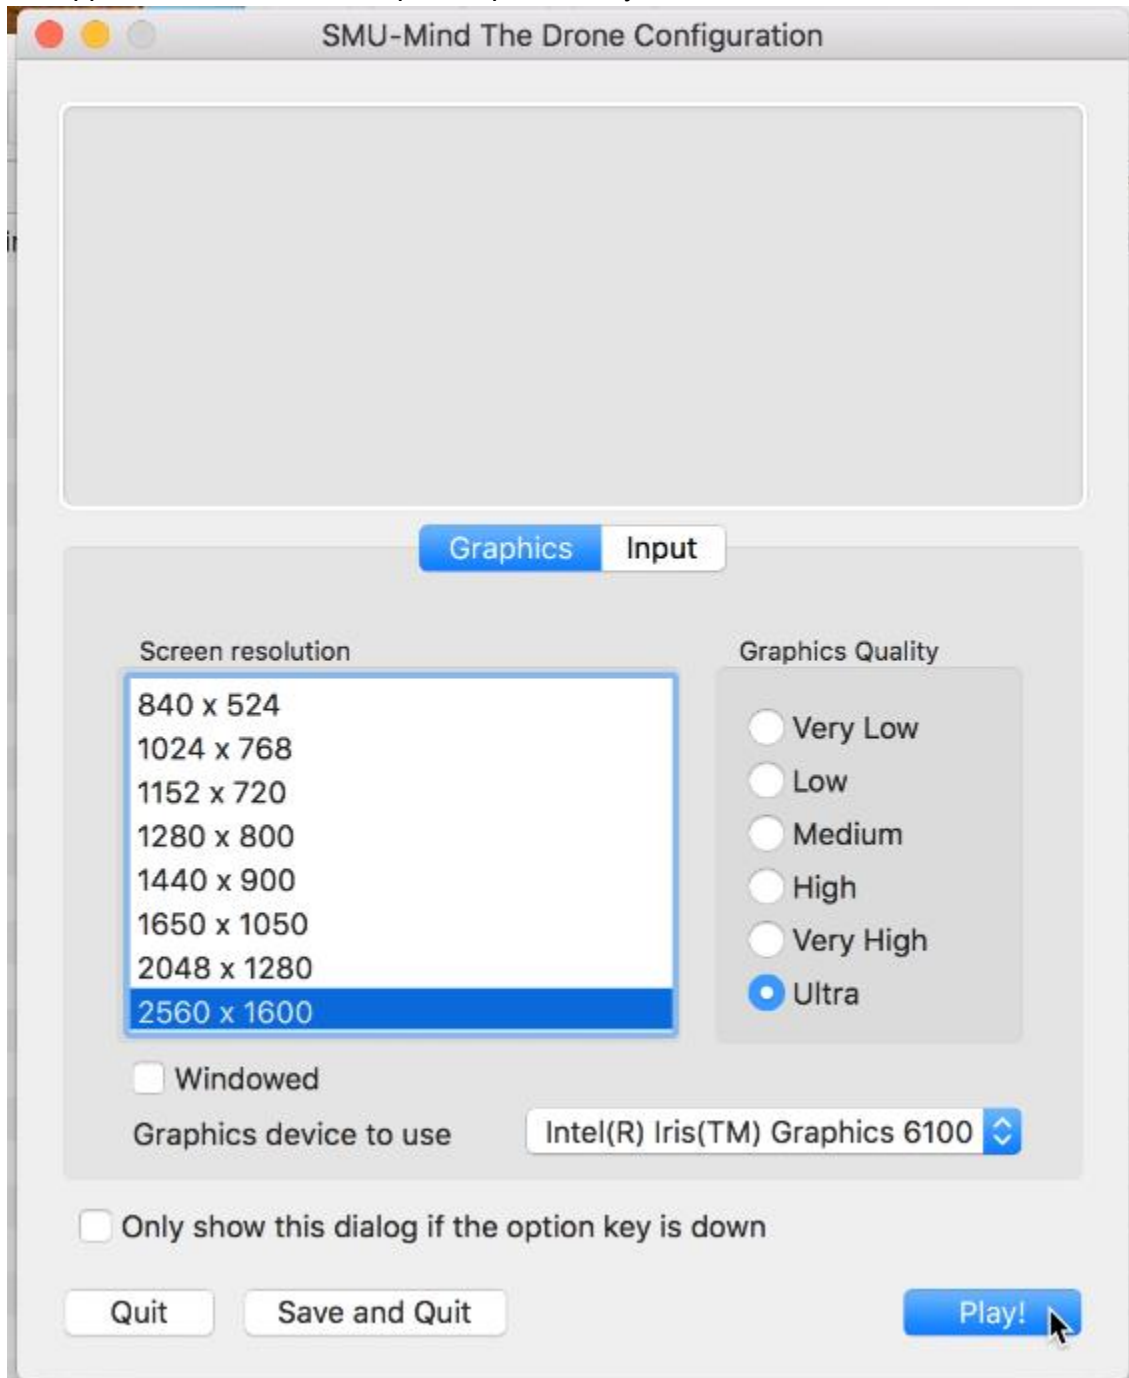

7. Navigate to the director where you have unzipped the files
8. Press the "control (CTRL)" button and left click on "MindTheDrone.app" file
9. Select "Open"

10. In the prompt that shows up “MindTheDrones is from an unidentified developer”, select “OKAY”

11. In the configuration prompt the opens, you can change resolution and texture quality of the application, if not desired, please press “Play”

12. Application will start
